

BAVARIA COP 1809

Common Operating Picture

User Guide

Flight of the Eagle Wargame | U.S. Army War College | 1809 Danube Campaign

FOR EDUCATIONAL USE — USAWC PROFESSIONAL MILITARY EDUCATION

1. Overview

The Bavaria COP 1809 is a browser-based Common Operating Picture for the Flight of the Eagle wargame at the U.S. Army War College. It tracks unit positions, movement orders, routes, contact between forces, and the Order of Battle hierarchy across the 1809 Bavaria theater.

The app runs in a web browser using OpenStreetMap. An internet connection is needed on first load to cache map tiles. After that it can run offline.

1.1 System Requirements

Requirement	Details
Browser	Google Chrome or Microsoft Edge (recommended)
Internet	Required on first open to load map tiles
File	bavaria_cop_leaflet.html — open directly in browser
Screen	Minimum 1280x720 recommended

1.2 Opening the Application

- Download bavaria_cop_leaflet.html to your computer
- Rename if needed — avoid spaces and parentheses (e.g. bavaria_cop_1809.html)
- Open Google Chrome and drag the file into the browser window
- The map loads centered on the 1809 theater between Donauwörth and Passau

Note: If the map appears black, check your internet connection. The Leaflet library loads from Cloudflare CDN on first use.

2. Interface Layout

The application has three zones: the Header bar at the top, the Map in the center, and the Sidebar on the right.

2.1 Header Bar — Game Clock

Control	Function
Clock Display	Shows current DTG: DD HHMM APR (e.g. 16 0600 APR = 16 April at 0600)
-1H / -30M	Step clock backward by 1 hour or 30 minutes
+30M / +1H	Step clock forward by 30 minutes or 1 hour
Speed Selector	Set playback speed: 1x, 5x, 30x, or 60x real time
PLAY / PAUSE	Start or stop automatic clock advancement

2.2 Perspective Toggle

The PLAYING AS bar determines which faction shows as friendly (blue rectangle) or enemy (red diamond).

- FRENCH — French = blue rectangles, Austrian = red diamonds
- AUSTRIAN — Austrian = blue rectangles, French = red diamonds

2.3 Map Controls

Action	Result
Scroll wheel	Zoom in and out
Click and drag	Pan the map
Hover over gold dot	Show town name
Click unit marker	Select unit and open detail popup

3. PLACE Tab — Adding and Removing Units

3.1 Place Unit via Dropdown

- Select FRENCH or AUSTRIAN faction
- Pick unit from the Unit dropdown
- Pick town from the Location dropdown
- Click PLACE — marker appears on map

3.2 Place Unit by Clicking the Map

- Select faction and unit from dropdowns
- Click CLICK MAP — button turns green, cursor becomes crosshair
- Click anywhere on the map
- Clicks within ~5 km of a town snap to that town automatically
- Clicks in open terrain place at exact field position

Note: To cancel click-place mode without placing, click the cancel button.

3.3 Add a Custom Town

- Click + ADD CUSTOM TOWN
- Type the town name and click OK
- Click the map where the town is located
- Town is added to all dropdowns immediately

Note: Custom towns are session-only and must be re-added after reloading the file.

3.4 Pre-Loaded Starting Positions — 16 APR 1809 at 0600

Unit	Location	Faction
Napoleon	Donauwörth	French — Army HQ
Davout HQ, Morand, Saint-Hilaire, Gudin, Friant, Demont, Montbrun, Saint-Sulpice	Regensburg	French — III Corps
Vandamme HQ, Württemberg Cav, Württemberg Inf, Nansouty	Weihmichl	French — VIII Corps
Hiller	Landshut	Austrian — VI Corps
Archduke Charles HQ, Hohenzollern, Rosenberg, Bellegarde, FML von Kienmayer	Straubing	Austrian — Hauptarmee

4. MOVE Tab — Movement Orders

Build multi-leg route orders up to three waypoints. Distance and ETA calculate automatically from real GPS coordinates.

4.1 Unit Speeds

Unit Type	Speed	Examples
Army/Corps HQ courier	8 km/hr	Napoleon, Berthier
French/Austrian Cavalry HQ	5 km/hr	Davout HQ, Vandamme HQ
French Cavalry	5 km/hr	Montbrun, Saint-Sulpice, Nansouty
French Line Infantry	4 km/hr	Morand, Friant, Gudin
Austrian Cavalry	4 km/hr	FML von Kienmayer, Liechtenstein
Austrian Infantry	3 km/hr	Hohenzollern, Rosenberg, Hiller

Note: Distances are straight-line (as the crow flies). Apply terrain modifiers manually per the umpire rules.

4.2 Building a Route Order

- Select the unit from the Unit dropdown
- Click + ADD WAYPOINT — a leg entry appears
- Pick destination town and enter departure time (format: DD HHMM, e.g. 16 0800)
- Distance, travel time, and ETA calculate automatically
- Add up to 3 legs — leave depart time blank on legs 2 and 3 for auto-cascade
- Route summary shows total distance, time, and final ETA
- Click ISSUE — dashed route line appears on the map

4.3 Clearing a Route

- Select the unit in the MOVE tab
- Click CLEAR to remove all waypoints and cancel the route

5. OOB Tab — Order of Battle Hierarchy

The OOB tab shows the full command hierarchy pre-loaded with the historical 1809 order of battle.

5.1 Using the OOB Tree

- Click any unit name in the tree to select it and center the map on it
- French units appear at top in blue, Austrian units below in amber
- Subordinates are indented beneath their commander

5.2 Editing the Hierarchy

- Select the unit and new parent from the dropdowns in the OOB tab
- Click ASSIGN to update the relationship
- Select None as the parent to detach a unit from all hierarchy

5.3 Reset and Clear

- RESET 1809 — restores the full historical OOB with one click
- CLEAR ALL — removes all parent/child relationships

6. INTEL Tab — Contact Detection

Alert Type	Trigger	Meaning
ENGAGEMENT	Units within 5 km	Forces in direct contact — battle imminent
CONTACT	Units within 25 km	Forces in close proximity — contact likely
PROJECTED	Destinations within 20 km	Routes converging — future contact likely

The Movement Log records all actions during the session with timestamps. The 30 most recent entries are shown.

7. NATO Unit Symbols

Symbol	Meaning	Details
Blue Rectangle	Friendly unit	Your faction per perspective setting. HQ units have white border.
Red Diamond	Enemy unit	Opposing faction. Four-quadrant pattern. HQ units slightly larger.

Each marker shows a 3-letter unit abbreviation. Clicking opens a popup with full details including faction, corps, type, speed, location, route, and OOB relationships.

8. Quick Reference

I Want To...	How To Do It
Place a unit at a town	PLACE tab > Select faction/unit/town > PLACE
Place a unit on the map	PLACE tab > Select unit > CLICK MAP > Click location
Add a custom town	PLACE tab > + ADD CUSTOM TOWN > Type name > Click map
Issue a move order	MOVE tab > Select unit > + ADD WAYPOINT > Set destination/time > ISSUE
See unit details	Click the unit marker on the map
Switch perspective	Click FRENCH or AUSTRIAN in the perspective bar
Advance the clock	Click +30M or +1H in the header
Play clock automatically	Set speed > Click PLAY
View OOB hierarchy	Click the OOB tab
Reassign a commander	OOB tab > Select unit and parent > ASSIGN
Reset to 1809 OOB	OOB tab > Click RESET 1809
See contact alerts	Click the INTEL tab
Remove a unit	Select it > PLACE tab > REMOVE SELECTED
Cancel a move order	MOVE tab > Select unit > CLEAR

9. Troubleshooting

Problem	Solution
Map appears black	Check internet connection. Leaflet loads from Cloudflare CDN on first use.
No map tiles visible	OpenStreetMap may be blocked on your network. Try a personal hotspot.
File security error in Chrome	Rename file to remove spaces and parentheses, then reopen.
Wrong ETA	Check depart time format: DD HHMM (e.g. 16 0800 for 16 April 0800).
Unit not snapping to town	Snap radius is ~5 km. Zoom in and click closer to the gold dot.

Problem	Solution
Custom town gone after reload	Custom towns are session-only. Re-add after reloading.
